## ***Access to Prevention, Care, Treatment and Services Saves Lives and Treasury***

For individuals with Mental and Substance Use conditions, access to community Education, Prevention, Care, Treatment and Services improves client outcomes, contributes to safe and healthy communities, and produces savings.

***Provider Results*** from across the state demonstrate the value of access to community mental health and substance use prevention, care, treatment and services in children, adolescents and adult lives.

Investments in community care, treatment and services for mental and substance use disorders and conditions pay dividends. Illinois' health care reform for complex and "high-need populations" must address health care disparities, provide culturally and linguistically appropriate care, and contain costs or **generate net savings - saving both lives and treasury.**

The Provider Results' summaries from providers across Illinois provide the backdrop for the real stories on how:

- ***Prevention Works!***
- ***Treatment is Effective!***
- ***People Recover!***

***Access to Prevention, Care, Treatment and Services  
Saves Lives and Treasury***

***On the following pages, please find the  
Table of Contents with links to the sections of  
our latest compilation covering over 90 pages of  
Provider Results.***

***Children and Adolescents***

***Adults, Mental Health***

***Adults, Substance Use Disorder and Conditions***
